**Favorite Thing Right Now:** "The Bauhaus! One of the most influential currents in Modernist architecture and design in the '20s and '30s. Bauhaus promoted the idea that artful objects, fine arts and design, should also be partnered with technology to create livable, rational and functional living spaces. Bauhaus seeks to reimagine the material world to reflect the unity of all the arts. This is exactly what I try to achieve in my interiors, and also, to find the perfect balance between all of the elements bounded in one room: interior architecture, furniture, arts and technology. I look for unity."
